PROFESSIONAL SUMMARY

Data Analyst skilled in Python, SQL, Power BI, and Excel with hands-on experience in ETL pipelines, EDA, and KPI dashboard development. Proven ability to clean and analyze large datasets, uncover actionable business insights, and present findings to stakeholders. Seeking a data analyst role to drive data-driven decision-making and deliver measurable business value.

EDUCATION

SRM ARTS AND SCIENCE COLLEGE

Bachelor of Science in CS, Minor in Artificial Intelligence | 7.0+ CGPA

Madras University

Jun. 2023 – May 2026

Wisdom Vidhyashram International School

Computer Science

State board, TN

Jun. 2022 – May 2023

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, Dax basics

Data Analysis & Visualization: Power BI, Excel, Pandas, Statistical Analysis

Tools & Tech: GitHub, MySQL, Jupyter Notebook, Google Colab, ETL, Data Modeling, EDA

EXPERIENCE

Data Analyst - Virtual Experience Program

Deloitte

May 2025

Forage

- Performed data cleaning and quality assurance on datasets containing 10,000+ records, ensuring data accuracy and integrity for comprehensive business reporting and analytics
- Designed and developed 5+ interactive dashboards in Power BI and Excel, enabling stakeholders to visualize key performance metrics and trends
- Analyzed sales and operational datasets using Python and SQL to identify revenue trends and performance gaps, presenting findings via structured reports to project leads to support strategic business decision-making.

PROJECTS

EXCEL - BASED HR METRICS REPORTING | [Link](#)

Oct 2025 – Nov 2025

- Analyzed gender-based workforce distribution across departments using Excel, surfacing diversity and representation insights for HR decision-making.
- Identified high-turnover departments using pivot table analysis in Excel, enabling targeted HR retention interventions.
- Segmented attrition data by job role using Excel dashboards to highlight critical positions and support focused retention strategies.

CUSTOMER BEHAVIOR INSIGHTS ANALYSIS | [Link](#)

Dec 2025 – Feb 2026

- Performed EDA on 3,900 transactions across 18 variables using Python (Pandas), uncovering spending patterns and high-value customer segments.
- Built a Python ETL pipeline with feature engineering and MySQL integration, delivering clean, production-ready data sets for analysis.
- Identified Express shipping customers (73% higher spend) and discount-driven segments using cohort analysis, enabling targeted marketing and loyalty program design.
- Delivered BI report with recommendations on subscription optimization, discount policy, and product positioning to drive retention and revenue growth.
